

DEV COMMUNITY PROTOCOL

Membership Participation Policy

A document explaining how the system works — not an investment offer.

DEV COMMUNITY

GETTING STARTED

How to Join

Invest from 10 USDT

Pay with USDT or DCT token — unlimited number of investments.

Sponsor Key (optional)

Enter your referrer's key. Leave it blank to join the general system automatically.

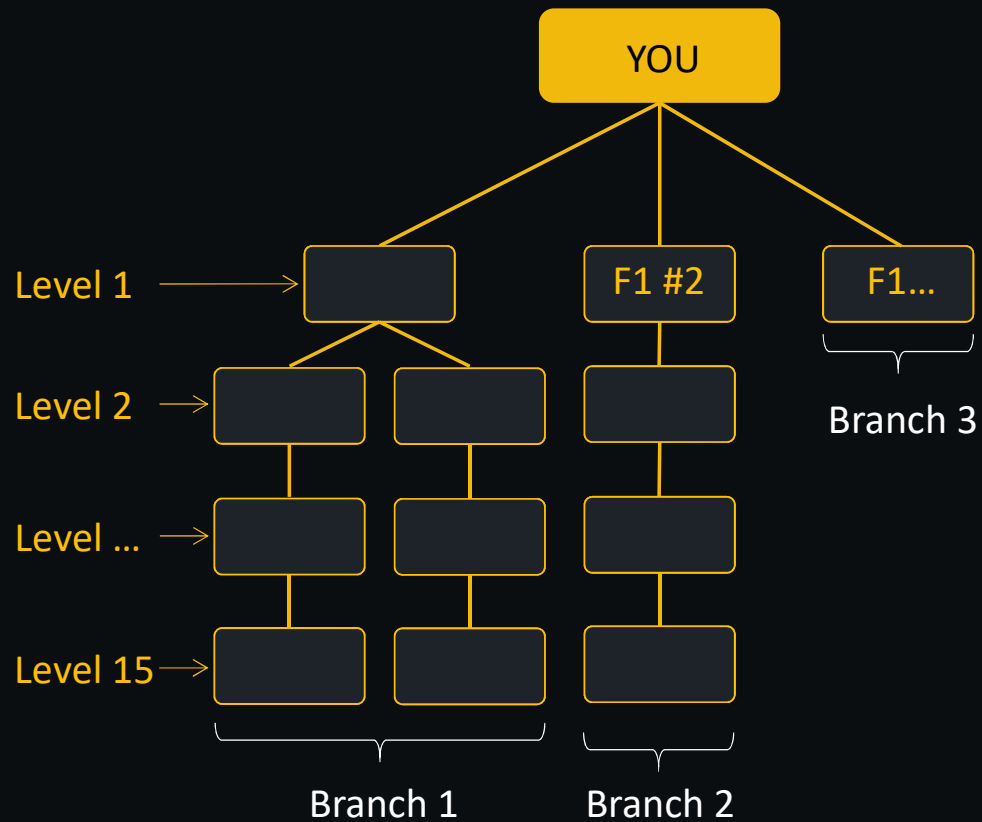

Pay with DCT = DCT is burned

Doesn't go through an exchange — the tokens used for payment are burned directly.

SUN MATRIX SYSTEM STRUCTURE

1

- The first F1 is placed into the nearest open slot within 15 levels of branch 1.
- If no slot is open within 15 levels, branch 2 opens.

2

- When you get a 2nd F1, branch 2 opens and the 2nd F1 is placed at its head.

3

- The 3rd F1 is placed into an open slot within 15 levels of branch 1 or branch 2.
- If multiple slots are open, priority goes to whoever registered earliest.

4

- If no valid slot exists within 15 levels of the current branches, a new branch opens and the new F1 is placed at its head.

5

- A valid open slot is the first position in branch 1 of anyone within 15 levels of the sponsor.

VESTING

How the DCT vesting amount is calculated

$$\text{Investment amount} \times 105\% \div \text{Protection price} = \text{DCT vesting amount}$$

“Protection price” is the time-weighted average price over 1 hour or 24 hours (whichever is higher) — not the instantaneous price at the exact second you invest — so a brief, abnormal price swing doesn’t skew the number of tokens you receive.

EXAMPLE

Invest \$100 when the protection price is \$0.0001/DCT → $100 \times 1.05 \div 0.0001 = 1,050,000$ DCT

DEV COMMUNITY

VESTING

20-day unlock schedule

UNLOCKS 5% EVERY DAY

Day 1

Day 20

Unlocked DCT can be claimed at any time. After claiming, it can be swapped for USDT at any time.

NOTE

The 105% here refers to the number of DCT TOKENS, not a USDT value. If the token price changes from the time of your investment, the USDT value when you claim may be higher or lower than at the time you invested.

DEV COMMUNITY

REWARDS

Matrix Commission

Generated when anyone within up to 10 matrix levels below you claims vesting

Level 1	0.5%
Level 2	0.5%
Level 3	0.5%
...	
Level 10	0.5%

1

A fixed 0.5% rate at every level — it doesn't decrease with depth.

2

Eligibility: your account is active (has a currently valid package) and your cumulative real investment is \$50 or more.

3

Not eligible → that commission simply isn't generated. It doesn't go to anyone else — it just reduces overall inflation, with one less share drawn from the community's shared pool.

DEV COMMUNITY

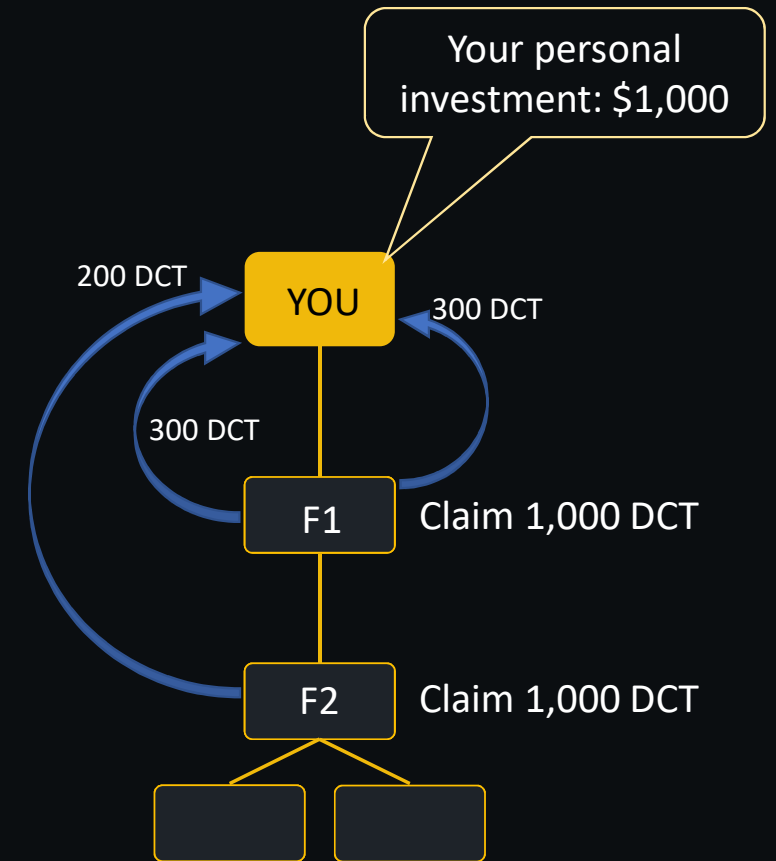

REWARDS

Matching Commission (Income on Income)

Generated when your F1 and F2 claim commission.

Personal Investment Level	F1	F2
Under \$100 (Basic)	0%	0%
\$100 – \$499 (Builder)	20%	0%
\$500 – \$999 (Leader)	20%	20%
\$1,000+ (Partner)	30%	20%

Income cap: everyone has their own income limit based on exactly how much they've actually invested — invest more, and your limit is higher.

DEV COMMUNITY

NOTE

Before You Participate

i

The figures in this document (105%, 5%/day, commission rates...) describe how the system's formulas calculate outcomes — they are illustrative and theoretical, based on the formulas, not a commitment, forecast, or guarantee of profit.

~

The token price can rise or fall with the market, independent of the number of tokens you receive.

\$

Only participate with an amount you're comfortable exploring with.
